

EAT YOUR GREEN SERIES

BOOK 1

EAT YOUR GREEN

Mom's Ultimate Guide to

RAISE VEGGIE LOVING KIDS

PRERNA SULTANIA

*A Perfect Guide
for Mothers to Help
Their Children Eat
Green Vegetables*

Introduction

Every mother knows the struggle : The little face that turns away at the sight of something green on the plate.

But what if greens didn't have to mean 'boring' or 'yucky'? What if vegetables could be fun, colorful, and exciting.

Eat Your Green is your friendly guide to help children build a healthy relationship with vegetables -not through pressure, but through play, patience, and creativity.

Together, we'll explore 5C's , clever tricks, and small changes that can make big difference at your dining table.

For every mother who lovingly fights the daily battle of making her child eat greens : this book is for you to remind you that patience, creativity, and love can turn even spinach into a smile.

About The Author

Prerna Sultania

is a passionate advocate for healthy, joyful eating habits in children.

As a mother herself, she has spent years finding creative ways to make vegetables fun, colourful, and enjoyable.

Her mission is simple :

To help mothers turn mealtime stress into smiles and transform nutrition into love.

Eat Your Green is her heartfelt effort to share easy, practical tips that actually work straight from her kitchen to yours.

Real Mom

She understands the daily challenges moms face.

Practical Tips

Her advice is easy to follow and fits real life.

Made with Love

Every tip comes from her kitchen and her heart.

Better Futures

Helping kids build healthy habits for life.

Thank you for letting me be a part of your journey towards happier, healthier kids!

Green Power Heroes!

Green vegetables are tiny heroes with big powers!
Each green helps your body in a special way so you can
grow happy, strong, and healthy.

Broccoli

Helps build strong bones
and keeps your body protected.

Spinach

Gives you energy and helps
your muscles grow strong.

Peas

Full of protein that helps
you grow and stay active.

Coriander & Mint

Help your tummy feel good
and keep your body fresh.

Drumstick Leaves (Moringa)

Rich in iron and great for
building strong bones.

Little Learning, Big Change ♥

When children learn the superpower behind each green,
they stop seeing vegetables as a challenge
and start seeing them as something to feel proud of. ♥

Greens By Season (India)

Summer (March-June)

- Amaranth
- Ridge Gourd
- Moringa Leaves
- Malabar Spinach
- Mint

Monsoon (July-September)

- Spinach
- Fenugreek
- Beans
- Pumpkin Leaves
- Curry Leaves

Winter (October-February)

- Mustard Greens
- Broccoli
- Coriander
- Peas

Tip : Eating local and seasonal greens keeps the nutrient high - and your grocery bill low.

What Parents Are Saying

Real moms, real stories – how
Eat Your Green changed mealtime!

“

★ My daughter used to hate anything green – now she helps me make spinach rotis!”
— Ritika Sharma, Jaipur

★ The stories and visuals made veggies fun for my twins. They actually ask for broccoli now!”
— Neha Bansal, Gurgaon

★ Love the family ideas – ‘Weekend Smoothie Day’ became our Sunday ritual.
— Aarushi Mehta, Mumbai

★ Such a practical guide for moms! The planner and grocery list pages are so easy to follow.”
— Sonal Jain, Pune

How to Use This Guide

A gentle flow to help your child feel comfortable with greens—one step at a time.

UNDERSTAND

Learn where your child is starting from, without judgment.

CURIOSITY

Invite interest through stories, visuals, and playful exposure.

CONNECT

Build emotional safety around food before focusing on eating.

CREATIVITY

Encourage expression through play, art, and choice.

CONSISTENCY

Offer regular, pressure-free exposure to greens in everyday moments.

CONFIDENCE

Celebrate small wins.
Trust the process.
Let your child grow confidence at their own pace.

How to Use the Content

Read

- Use the illustrations to spark conversations, not lessons.
- Pause, observe, and let your child respond in their own way.

Play

- Follow your child's interest.
- Repeat favourites. Skip what doesn't land. Nothing is compulsory.

Try

- Use worksheets as tools for expression, not evaluation.

Track

- Monitor exposure, not consumption.

Reflect

- Use checklists as gentle reminders.
- Celebrate progress, no matter how small.

 This guide is meant to support your rhythm—not replace it. 

STAGE 1 – UNDERSTAND

Before change comes understanding.

A calm beginning to your journey. This stage helps you see greens from your child's perspective – with empathy, not pressure.

What you'll learn:

-  Why children resist greens
-  Texture, taste & sensory triggers
-  Why pressure backfires
-  How emotions shape mealtime

How this moves you toward the bigger goal:

Understanding reduces anxiety (yours and your child's) and creates the safe foundation needed for greens acceptance.

You are here – Stage 1 of 6

REAL PARENTS, REAL PAIN POINTS

Limited Choices

Kids eating the same foods over and over again

Tired of Fighting

Constant power struggles and refusals at mealtime

Worried About Nutrition

Fearful of nutritional gaps affecting your child's health

Lacking Peace

Hoping for calmer, happier mealtimes with less stress

Why kids refuse Greens

Every child has a reason to avoid greens- The taste, the texture, or even just the color!

🥦 **Bitterness:** Many greens like spinach or methi have natural bitterness that children's taste buds are more sensitive to.

🥬 **Texture:** Mushy or leafy textures can feel "strange" in their mouths.

🥦 **Appearance:** Bright green food can look "too healthy" or "different" from their favorites.

But here's the secret:
Kids don't hate greens-
they hate boring food.
When vegetables are
cooked creatively,
presented playfully,
and served with love,
even spinach becomes a
superhero on their plate.

The Science of Habit

How Tiny Actions Grow Big Changes

The Habit Loop (Made Simple for Moms)

Patterns & Safety

Children's brains are built on patterns and safety. Every time an experience is repeated, it strengthens the "neural bridge" between "trying" and "liking."

Why Greens Matter

And How To Make It Happen

1. Nutrient Power

Greens are rich in fiber, vitamins, and iron - essential building blocks for strong immunity, brain development, and healthy growth.

3. Early Introduction Matters

The earlier children are exposed to greens, the more familiar they become. Familiarity slowly turns “eww” into “okay” and eventually into “yum.”

2. Connection Over Pressure

Children learn better through connection and gentle encouragement. Positive experiences activate curiosity and openness far more than forcing a bite ever will.

4. Repetition Builds Routine

Research shows children may need 10-15 friendly exposures to accept a new food. If they say “no” today, that’s okay- you’re building trust, not taste.

Moms Tip

Don’t be a green perfectionist. Progress matters more than plates wiped clean.

4C Path To Loving Greens

Curiosity - Connection - Creativity - Consistency

Because little habits grow where hearts connect.

C1. CURIOSITY

THE SPARK OF DISCOVERY

- Green Detective
- Sneha Spinach Story
- Veggie Parade
- Green Plate Lab

C2. CONNECTION

THE HEART BEHIND THE BITE

- Color Connection
- Sensory Connection
- Experience Connection
- Parental Connection

C3. CREATIVITY

PLAYFULL PLATES, JOYFUL HEARTS

- Color Lab Salad
- Taste Lab Game
- DIY Plate Art

C4. CONSISTENCY

THE GENTLE HABIT

- Printable Reward Chart
- Habit Tracker
- Notebook of Wonders

**Eat Your Green isn't just a guide-it's your family's journey from
picky to proud.**

STAGE 2— SPARK CURIOSITY

When greens become an adventure.

A playful step in your journey. This stage turns greens from something to “finish” into something to explore — gently, joyfully, without pressure.

What you'll learn:

- How curiosity reduces food anxiety
- How to make greens feel safe through play
- Simple ways to spark interest before eating
- How exploration leads to acceptance

How this moves you toward the bigger goal:

Curiosity replaces resistance — helping your child approach greens with comfort, confidence, and willingness.

You are here — Stage 2 of 6

C1:Curiosity

THE SPARK OF DISCOVERY

When kids explore, they eat better.

Green Detective - Find where your veggies come from.

Sneha Spinach Story - Giving dishes fun names.

Veggie Parade - Celebrate greens in a colorful lineup.

Green Plate Lab - Explore textures and colors on your plate.

The Green Detective

Every bite hides a mystery waiting to be solved!

One evening, Aarav crossed his arms at the dinnertable.

“Something’s hiding in my food!” he said, squinting at his plate.

Mom smiled “Detective Aarav, your mission is to find every green suspect!”

With his fork like a magnifying glass, he started hunting- first a sneaky pea, then a tiny leaf of basil, then a green bean peeking from rice.

“Case closed!” he laughed, taking a big bite.

Tip : Make greens a game, kids chase what they discover.

Sneha's Spinach Story

How Sneha Got Her Picky Eater to Love Spinach Parathas!

A real mom's trick that turned greens into smiles.

Sneha used to worry every time her son, Dhruv, refused to eat his greens. One day, she blended spinach into paratha dough, added a bit of grated cheese, and called them "Superman Rotis." Dhruv loved the color and the name! Soon, green became his favorite color on the plate.

"The secret", Sneha laughs, "is not hiding the greens-it's giving them a story!"

Mom Tip

Give dishes fun names- Popeye Pasta, Power Parathas, Monster Muffins! Kids eat with imagination first.

Veggie Parade

Every evening, Tia's mom placed all the veggies on the table in a big, colorful line.

'Here they come!' she'd say, 'The Veggie Parade'. Tia chose whichever colorful vegetable she wanted to eat.

Broccoli, carrots, beans-Tia mom clapped and cheered for each one.

Science Says:

Children's brains are built on patterns and positive reinforcement. When kids are encouraged and celebrated for each small choice, curiosity grows into confidence.

The Green Plate Lab

Turn your kitchen into a mini science lab!

Greens don't just feed the body - they spark curiosity!
Try these fun, hands-on mini experiments with your child.

1. Mix & Match Color Lab

Combine greens with other foods
-see how colors change!

Try: Peas + Carrots → happy
orange-green bowl

Ask: "What new color do we see
today?"

2. Texture Test

Touch and feel your greens- crunchy,
smooth, soft, or crisp.

Try: Compare beans vs. lettuce vs
fenugreek (methi).

Ask: "Which one makes the best
crunch sound"?

3. Taste Adventure

Taste the same veggie in 3 ways -raw,
sautéed, or mixed in meal.

Let your child mark it with smiley
faces:

4. Observation Zone

Draw your favorite "green discovery" here!

Science Says

Curiosity wires the brain for confidence. Let your child **play with food**
before they eat it.

STAGE 3 — CONNECTION

Beyond food lies connection.

This section redefines mealtime not as a battle, but a place for deep connection between you and your child.

What you'll learn:

- Transformative power of connection
- The role of playful eye-contact
- How gentle touch builds trust
- Connection-based eating

How this moves you toward the bigger goal:

Connection ≠ compliance. When mealtime is about joy as much as nutrition, it becomes a space of bonding and growth.

You are here — Stage 3 of 6

C2:Connection

THE HEART BEHIND THE BITE

Color Connection:

- Tanu's Rainbow Lunchbox
- Rainbow Soup Rescue

Sensory Connection

- Grandma's Garden Pasta
- Messy Hands

Experiential Connection

- Chef Sreen Experiment
- Weekend with Dad
- Grow with Greens

Parental Connection

- Magic of Making Together
- Green Mirror
- Family Table Magic

The Color Connection

Colors feed moods before flavors feed the tongue.

Green calms. Yellow comforts. Orange inspires, Red excites,
When we play with colors on a plate, we don't just feed their body, we feed their feelings.

Mood & Color Chart:	Emotion	Food Example
Green	Calm & Focus	Spinach, peas
Yellow	Joy & Comfort	Corn, pumpkin
Orange	Creativity & Play	Carrot, bell pepper
Red	Energy & Excitent	Tomato, beetroot

Tip:

On tiring days, serve greens with a hint of yellow for joy.
On lazy days, add a dash of orange for spark!

Tanu's Rainbow Lunchbox

A splash of colour turned one picky eater into
a curious foodie!

Tanu wanted her daughter Myra to love greens. But Myra preferred only red and yellow foods.

One day, Tanu packed a "Rainbow Lunchbox," with green spinach puri, orange carrot sticks, yellow corn, and red cherry tomatoes.

Myra opened her tiffin and gasped, "Wow Mama, my lunch has colours like my crayons!" From that day, every lunch became an art project and greens finally joined the fun.

Mom Tip: Add colour to the plate-kids love patterns!
Mix greens with reds and yellows for a cheerful look.

The Rainbow Soup Rescue

How one colorful idea saved family dinners!

Every evening, Meera's daughter would push away her bowl if she spotted anything green.

One rainy day, Meera decided to turn dinner into an art project. "Let's make 'Rainbow Soup!'" she said. Together, they added green peas, yellow corn, red tomatoes, and orange carrots.

As they stirred, Meera whispered, "Each color has superpowers red gives energy, yellow brings cheer, and green helps you grow strong."

When the soup was ready, her daughter took one sip and giggled, "This tastes like a rainbow!"

Mom Tip:

Let kids stir, pour, and play-curiosity is the best seasoning.

Little Chef Green Experiment

When kitchen fun turns into a healthy surprise!

Whenever Priyam visited his grandparents, he noticed that everyone cooked together. One afternoon, he

proudly declared,

“Today, I’m the chef”

He mixed mashed peas, spinach purée, and a pinch of cheese—then rolled them into tiny green balls and called them “Monster Munchies.”

Priyam grinned and said,
“See? Even monsters love greens!”

Now, whenever Priyam wants green munchies, he says, “It tastes like Grandma’s hugs.”

Chef's Tip:

Give kids a free hand (and an apron!). When they mix, mash, and invent, they begin enjoying food their own way.

Weekend with Dad: Smoothie Day!

A father-daughter ritual that turned greens into weekend fun!

Every Sunday morning Nikhil and his daughter Anaya became smoothie chefs.

They'd gather spinach, banana, apple, and a splash of milk - then blend it into a green swirl of magic. 'Who's the taste tester today?' Nikhil would ask, and Anaya would giggle, taking the first sip.

Now, smoothies are their weekend tradition - and greens are no longer a fight but a delight!

Dad Tip:

Let kids blend their own greens. When they help make it, they'll always want to taste it!

Grow With Greens

Because little hands grow strong when they grow with care.

Plants don't grow overnight and neither do habits. Each time your child waters a plant, picks a leaf, or helps serve salad, they're learning to care - for food, nature, and for themselves.

Watching greens grow teaches more than eating ever could. It teaches patience, pride, and the quiet joy of watching life unfold.

Green Tip : "When little hands grow greens, big hearts" bloom."

Grandma's Garden Pasta

A spoonful of love and greens from Grandma's backyard!

Whenever Atharva visited Grandma, he always ran to her little garden first. Together, they'd pluck fresh spinach, basil, and peas - Grandma said, "The best pasta sauce grows right here!"

Atharva helped her blend the greens with garlic and cheese, turning it into a bright green sauce.

As they cooked, the kitchen filled with laughter and the aroma of home.

Grandma's Tip:

Let kids touch, pick, and smell the greens. When they help grow food, they grow to love it too!

Messy Hands, Happy Hearts

Let them squish, stir, and sprinkle. When kids touch food, they build
friendship with it.

They're not making a mess-they're making memories.

Try this:

Let your child tear a spinach leaf.
Ask them to stir the soup
Count the peas together.

Hands first, hearts next-that's how love for food grows.

The Magic of Making Together

The joyful mess of co-creating meals with little hands

Making peas or kneading dough.

It's about laughter, learning, and a sprinkle of flour on the nose.

**Tip : Each messy spoon stirred builds connection-
leaving a mark deeper than any recipe ever could.**

Family Table Magic

Where little hands, big hearts, and green plates
come together.

The family table is more than a place -it's where memories simmer, stories are served, and greens find their way into tiny hearts.

When everyone joins - stirring, setting, tasting food becomes more than a meal.

It becomes a moment of togetherness.

At the table, greens stop being "their food" and become "our story."

The Green Mirror

Children learn by reflection, not correction.

Every time we smile through a refused bite or choose patience over pressure, we teach something deeper than “eat your vegetables.”

We teach trust.

They don't copy our plates they copy our peace.

So breathe, smile, and take your own bite first.

Sometimes, love is the best seasoning.

STAGE 4 – UNLEASH CREATIVITY

When mealtime becomes playful.

Encouragement creates room for creativity. This stage turns greens into an opportunity to experiment and innovate – with more fun, less fear.

What you'll learn:

- How creativity reduces stress
- Ways to make greens more fun
- Simple switches to ease power struggles
- Healthy coping tools for kids

How this moves you toward the bigger goal:

Inspiration turns struggle into connection, making mealtime a space for joy and creative expression.

You are here – Stage 4 of 6

C3: Creativity

PLAYFUL PLATES, JOYFUL HEARTS

Colors, textures, and imagination make greens irresistible.

COLOR LAB SALAD

Make your own rainbow salad using at least four bright colors.

TASTE LAB GAME

Guess the flavor blindfolded and become a little food scientist.

DIY PLATE ART

Turn veggies into fun faces, shapes, and patterns.

COLOR LAB SALAD

Mix, match, and discover the rainbow on your plate!

WHAT YOU'LL NEED

Green veggies (spinach, cucumber, peas)

Red veggies (tomato, beetroot)

Yellow / orange vegetables (corn, carrot, pumpkin)

Purple veggies (optional: cabbage, beetroot)

One empty bowl

One plate

HOW TO PLAY

- 1 Let your child choose at least 3 different colors of vegetables.
- 2 Add one color at a time to the bowl.
- 3 Talk about how each color looks, smells, and tastes.
- 4 Mix everything together and enjoy the salad!

✓ Encourage touching, smelling, and tasting – no pressure to finish!

COLOR MIX GUIDE

Color	Veggie Example	What It Adds
Green	Spinach, peas	Calm & strength
Red	Tomato, beetroot	Energy
Yellow	Corn, pumpkin	Comfort & joy
Orange	Carrot	Creativity

PARENT TIP:

Let your child lead the choices.
Curiosity builds acceptance faster than pressure.

Taste Lab Game

Guess the Flavor, Build Trust

When children explore food with curiosity instead of pressure, their brains stay open to learning.

HOW TO PLAY

Blindfold your child gently and explain the game with excitement. Offer one small bite at a time.

Ask your child to guess:

Is it crunchy or soft?

Is it sweet, mild, or earthy?

Let them remove the blindfold and see what they tasted.

Celebrate every guess right or wrong!

WHAT YOU'LL NEED

- 4-5 small bowls
- A clean scarf or soft cloth (blindfold)
- Tiny portions of cooked veggies (soft & safe):
 - Spinach
 - Carrot
 - Beetroot
 - Pumpkin
 - Cucumber

WHY THIS WORKS

- Builds sensory awareness
- Removes fear of new foods
- Encourages curiosity instead of control

Ask:

"Which one surprised you the most?"

"Would you like to try this again another day?"

(No pressure. Curiosity is the win.)

PARENT NOTE:

Today, my child explored food through touch, smell, and taste without fear or force.

D.I.Y. Plate Art

"She thought we were decorating dinner. I knew she was building confidence."

TRY THIS TOGETHER

Give your child a plate as canvas -let them create a garden, face, or rainbow. Celebrate their art before you eat it!

MOTHER'S NOTE

Today my child's creativity bloomed when.....

STAGE 5 — CONSISTENCY

When small steps create big change.

A steady stage in your journey, Consistency transforms new habits into lasting ones — gently, without pressure.

What you'll learn:

- How to build tiny daily green habits
- Why repetition creates safety
- Simple ways to make greens part of routine
- How to stay consistent without overwhelm

How this moves you toward the bigger goal:

Consistency turns curiosity and connection into real progress — helping your child build trust, predictability, and long-term comfort with greens.

You are here — Stage 5 of 6

C4: Consistency

THE GENTLE HABIT

Little steps grow big roots.

Printable Reward Chart

Celebrate every green win with fun stickers.

Notebook of Wonders

Make your own book of food memories.

Reward Stickers

Add motivation with colorful sticker rewards kids love.

Weekly Sticker Journey

Every brave bite earns a sticker.

How It Works

- 1 Try one green a day**
Any bite counts – spinach, peas, cucumber, or even a tiny taste.
- 2 Add a sticker** ★
Each day your child tries a green, place one **sticker** in that week's circle.
- 3 No pressure, just progress**
Skipped days are okay. We're building comfort, not perfection.
- 4 Celebrate at the end of the week** 🎉
When the week is done, celebrate effort with:
 - ✓ A high-five
 - ✓ Extra playtime
 - ✓ Choosing a family meal 🥦

4 stickers = choose a family reward

- ✓ Pick dinner music 🎵
- ✓ Extra bedtime story 📖
- ✓ Choose veggie for next meal 🥦

Parent Note: *Consistency builds confidence. Praise trying, not finishing.*

● **Tip:** Let your child place the sticker themselves – ownership increases motivation

My Green Days Tracker

PRINTABLE REWARD CHART

Every small bite counts!

Track your child's "green victories" each day.
Reward consistency, not perfection

1-Month Green Challenge

Week	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Week 1	☐	☐	☐	☐	☐	☐	☐
Week 2	☐	☐	☐	☐	☐	☐	☐
Week 3	☐	☐	☐	☐	☐	☐	☐
Week 4	☐	☐	☐	☐	☐	☐	☐

Add a sticker, star, or tick for every day your child tries a green food.

Green Hero Levels

Level	Stars Earned	Title
1	1-6 ★★	Green Starter
2	7-12 ★★	Leaf Champion
3	13-18 ★★	Veggie Adventurer
4	19+ ★★	Green hero

Celebrate Progress

When your child reaches a new level, Celebrate with:

A high-five

A sticker

Choosing a fun "green meal" together

The goal is confidence, curiosity, and connection - not pressure.

Our Notebook of Wonders

'She thought she was doodling.
I knew she was documenting wonder.'

Try This Together:

After every meal, draw one thing you noticed -a color, shape, smell, or change.

Over time, this becomes your family's Book of Food Memories.

Our Week of Little Wins

"Tiny steps, taken with joy,
become habits that last a lifetime."

Our 6-day streak

Monday	Watered Mintu	
Tuesday	Tried a new food color	
Wednesday	Talked about a food story	
Thursday	Helped in the kitchen	
Friday	Ate mindfully	
Saturday	Thanked nature for our food	

Our 6-day
streak

Mintu got watered
every day

Consistency
feels good!

Mother's Note: This week, we stayed consistent when...

The Habit of Wonder

"She thought we were watering a plant. I knew we were growing patience."

Our Little Sprout Baby

One evening we planted one coriander seed and she named it Mintu. Every morning she'd tiptoe to the window and whisper, "Has Mintu woken up yet?"

Days passed, and two tiny leaves peeked out. Her eyes widened -
"He's growing, Mumma!"

I smiled, knowing she was learning more than she realized-how patience feels, how care blooms, and how growth takes time.

Try This Together: Plant a few seeds - coriander, mint, or fenugreek. Observe and record changes daily.

Mother's Note: Today our little plant taught us about patience when.....

A Note to Mom's

You're Doing Better Than You Think

If you're measuring love by the number of peas eaten, it's easy to feel like you're "not doing enough."

But here's the truth: every green, every giggle, every moment at the table together counts more than you know.

You're nurturing something far bigger than a broccoli fan club- you're growing a love for real food that will bloom with your child.

So take a breath, sip that smoothie, and remember: You're amazing and your best is more than enough.

Working Mom's

10-Minute Greens Guide

A realistic, no-stress way to add greens on busy days

The Reality

Some mornings are rushed. Some evenings are exhausting.

And that's **okay**.

Healthy habits don't **need perfect cooking**-they need simple systems that fit real life.

The 10-Minute Greens Formula..

Choose ONE from each column. No chopping marathons. No fancy recipes.

1. Base (Ready in

- Washed spinach or lettuce (store-bought)
- Grated carrot or beetroot
- Cucumber slices
- Cherry tomatoes

2. Add-On (No Cooking Needed)

- Sprouted moong or chana
- Roasted peanuts or seeds
- Paneer cubes
- Boiled corn (store-bought or leftover)

3. Quick Mix Ideas

- **Lunchbox Salad:** Greens + corn + paneer + lemon
- **Wrap Filling:** Greens + sprouts + curd
- **Smoothie Boost:** Greens + fruit + curd/milk
- **Snack Plate:** Veg sticks + hummus/curd dip

Time Check

Washing: 5 minutes Mixing: 3 minutes Serving: 2 minutes.

That's it. Greens are done.

Working Mom Tip:

You don't need to cook greens every day -
You just need to serve them consistently.
Even a few bites count.

Gentle Reminder

If today's win is one cucumber slice eaten happily.
You are still building a habit.
Consistency beats perfection- always.

No-Cook Greens

Healthy greens don't always need cooking.
Sometimes, simple is powerful.

What This Is

A quick, no-pressure way to add greens to your child's day
no stove, no prep stress, no battles.

No-Cook Green Options

Choose 1-2 each day. Mix with foods
your child already likes.

- Finely chopped cucumber
- Grated carrot
- Soft avocado mash
- Tender lettuce or spinach, finely sliced
- Sprouted moong (lightly rinsed)
- Green chutney (small amount)
- Blanched peas (cooled, lightly mashed)

Easy Pairing Ideas

- Add greens to familiar foods:
- Curd + cucumber
- Sandwich + lettuce
- Roti roll + grated veggies
- Rice + ghee + green chutney
- Fruit bowl + a few green slices (for exposure, not eating)

Mom Tip (Very Important)

Serve tiny portions
No forcing, no bargaining
Let your child touch, smell and
explore.

Remember

Consistency builds comfort.
Comfort builds curiosity.
Curiosity builds healthy habits.

Greens on the Go

Healthy Bites that Travel well!

Spinach Muffins

Mini savory muffins made with spinach puree and grated cheese perfect for travel or school!

Veggie Wraps

Whole-wheat chapatis rolled with spinach, corn, and paneer. Wrap in foil for easy eating.

Mom Tip: Use colorful paper cups or napkins - kids love bright tiffins!

Greens On The Go

Healthy Bites That Travel Well

Spinach Chips

Baked spinach leaves, lightly seasoned and easy to pack.

Hummus Dip

Pack a tiffin of hummus with crunchy celery sticks.

Green Snacks in Minutes

SPINACH CHEESE
TOAST

GREEN SMOOHIE
SHOT

PEAS CHAAT

CORIANDER
DHOKLA BITES

Shop Smart, Eat Fresh

How to pick, store, and prep greens easily!

1. Pick Smart

Choose leaves that are firm, bright and crisp -avoid yellow or wilted ones.

2. Wash Right

Soak greens in clean water with a pinch of salt or vinegar for 5 minutes

3. Store Fresh

Wrap in batches- spinach or peas in small packs for quick cooking

Mom Tip:

Take your child to the vegetable market-let them pick their own greens!

Involve Your Kids

Turn the kitchen into a playground for learning!

Name the Veggies

Let your child guess the name, color, and smell of each green.

Little Helpers

Ask them to wash peas, stir dough, or garnish salad with mint leaves.

Create Faces or Shapes

Make parathas, toasts, or tiffins into smiley faces using spinach, peas, and cucumber.

Market Adventure

Give them “Green Chef of the Day” badges.

Small rewards make big smiles!

Tiffin Time

EASY LUNCHBOX IDEAS

Packing lunchboxes can be tough - especially when greens need to stay yummy even after hours! Here are some easy, school-tested ideas your kids will actually eat.

1. Peas & Paneer Paratha Rolls:

Mash boiled peas and paneer, stuff into parathas, roll and pack them.

2. Spinach Pasta Cups:

Toss spinach puree into pasta with melted cheese in mini puff pockets.

3. Cucumber Sandwich Bites:

Layer spinach chutney and cucumber slices between bread; cut into cute shapes.

Mom Tip: Use colorful lunch boxes and fun napkins - presentation matters! Kids eat with their eyes first.

Bitterness Buster

**Make bitter greens taste better -
no fights, no forcing.**

Add Citrus

**A squeeze of lemon or a splash of orange juice
balances harsh, bitter notes.**

Blend with Naturally Sweet Veggies

**Carrot, corn, pumpkin, and beet reduce bitterness
without adding sugar.**

Use Aromatics

**Garlic, jeera, hing, and ginger mellow strong flavors
instantly.**

Blanch & Shock

**Dip spinach/methi in boiling water for 30 seconds,
then ice water. Removes harshness + keeps color
bright.**

Add Flavorful Fats

**A little ghee, butter, or cheese smooths bitterness and
adds richness.**

Pair with Familiar Tastes

**Paneer, potatoes, dal, or pasta work as "taste bridges"
to greens.**

Crunch . Dip . Melt

Make greens tastier for kids with these methods.

Crunch

What: Make greens crispy-like chips or fries.

Why: Crunchy snacks are kid favorites.

Try: Roast kale or airfry broccoli.

PRO TIP
For Crunch Fans

For Crunch Fans Experiment with
crispy, hard textures kids love.

Dip

What: Disguise greens in fun dips.

Why: Kids focus on dipping, not veggies.

Try: Blend spinach into guacamole.

Melt

What: Mix greens into sauces.

Why: Melty foods are easy to eat.

Try: Add peas to a creamy mac 'n' cheese.

PRO TIP

For Soft Eaters:
Launch mellow
melters in soft,
smooth sauces

Smart Tricks to Make Greens Fun

Fun Faces: Use peas for eyes, cucumber slices for a smile, and spinach for hair.

Hidden Heroes: Blend spinach or methi into parathas, pasta, or sandwiches. Kids won't even notice!

Food Art: Create trees, flowers, and animals with green veggies.

Name the Dish: Call it "Monster Pasta" or "Popeye Rolls" - fun names work wonders!

When you mix play with food, kids start to see greens as fun, not force!

Food Art

Make Every Plate a Masterpiece!

Mealtime doesn't have to be serious - it can be creative!

Use veggies to make shapes:

- Broccoli trees
- Cucumber butterflies
- Carrot flowers
- Spinach rivers

Fun Challenge:

Have a "Food Art Friday"- every Friday, make one fun green themed plate together.

When Food Smiles Back!

Kids love faces-especially when they're made of food! Transform your dinner plate into a happy face and watch your child's eyes light up:

- Use peas or olives for eyes.
- Add cucumber slices for cheeks.
- Cherry tomato for a nose.
- Spinach or methi leaves for hair.
- A paratha or dosa as the face base!

Mom Tip: Ask your child to help you decorate-the more ownership they feel, the more likely they'll eat.

Name The Dish

The Power of a Fun Name!

When a meal sounds exciting, kids can't wait to try it!

- Green Ninja Paratha
- Spinach Power Rolls
- Magic Pea Soup
- Monster Pasta

Try This:

Let your child rename their own meal. They'll love the sense of ownership and the food even more!

Hidden Heroes

The Secret Greens That Save the Day!

Sometimes the best way to get kids to eat veggies is to let them 'disappear' into the dish!

Blend spinach or methi into paratha dough.

Add pureed broccoli to pasta sauce.

Mix shredded zucchini into muffins or pancakes.

Kids will enjoy the taste and you'll know every bite is packed with nutrition!

Mom Tip:

Play 'Guess the Green Game' ask your child to spot the hidden veggie ingredient after eating.

Smart Swaps for Picky Eaters

Small changes that sneak in big nutrition!

Swap chips for veggie sticks: Try cucumber or zucchini sticks with a cheesy dip.

Swap buttered toast for spinach toast: Replace butter with a mild spinach or pea spread - your child gets nutrients, and the toast still tastes yummy.

Swap ice cream for smoothie bowls: Blend banana + spinach + yogurt + honey - freeze and top with nuts.

Swap pizza toppings: Add chopped spinach, capicum, or corn & call it "Garden Pizza!"

Don't announce the swap, just serve it with a smile.

Pre Meal Adventures

Warm Up Before the Bite

Because connection begins even before the plate arrives.

What this stage is about:

- Creating a calm, playful mindset before eating
- Reducing anxiety and resistance
- Making greens feel familiar and safe
- Using micro-moments to build excitement

What you'll do:

- Short, sensory warm-up
- Fun naming and story-telling cues
- Tiny tasks that make your child feel involved
- Quick rituals that spark curiosity

How this moves you toward the bigger goal:

Pre-meal moments remove fear before it appears. Your child begins mealtime with comfort, control, and openness-the foundation for trying new greens willingly.

Pre-Meal Activities

A gentle way to spark curiosity before the first bite

Color Your Greens

Let kids explore vegetables through colors.

The Green Hunt

Find green foods around the kitchen or on the table.

Veggie Riddles & Match Games

Guess, match, and laugh with playful veggie clues.

Design the Menu

Invite your child to plan today's green plate.

Leaf Detective

Observe shapes, textures and smells of leafy greens.

Mystery Ingredient Game

Discover a surprise veggie through clues and curiosity.

Floating Veggies

Watch vegetables float or sink – food meets fun science.

Play first. Pressure later.

Color Your Greens

Spinach

Broccoli

Peas

Cucumber

Bottle
Gourd

My Favorite
Green!

The Green Hunt

Find, spot, and celebrate greens around you!

A playful way to build curiosity before the first bite.

How to Play

- ☒ Look around the kitchen, dining table, or plate.
- ☒ Spot **anything green** – food, leaves, or ingredients.
- ☒ Tick the greens you find.
- ☒ No pressure to eat – looking counts too!

Tick the Greens You See

- ☒ Spinach
- ☒ Broccoli
- ☒ Peas
- ☒ Cucumber
- ☒ Coriander
- ☒ Beans
- ☒ Capsicum
- ☒ Mint
- ☒ Bottle gourd
- ☒ Any other green: ____

Bonus Challenge (Optional)

- ☒ A light green veggie
- ☒ A dark green veggie
- ☒ A green with a **strong** smell
- ☒ A green that feels **soft** ____

Mom Tip

You don't have to say "eat it."

Say "**Can you find it?**"

Curiosity comes before appetite 

Veggie Riddles & Match Game

Can you guess the green?

Solve the riddles:

1. I'm tiny and round
I love to roll—kids
call me fun,
I'm full of soul!
2. I'm leafy and strong,
Popeye's friend
all along!
3. I'm long and green,
crunchy and clean!
4. I'm small and spicy,
I add flavor nicely!

👉 Match them up:

1. Add toasted bread
stars — kids love
floating shapes!

🍴🥘 Design the Menu 🌱

If your kitchen were a restaurant, what would be on the menu?

My restaurant is called:

 _____

Today's theme:

 _____

Starters

Main Course

Dessert

Our Family Favorites

☒ Favourite item: _____

☒ Healthiest choice: _____

Memory Box

Draw or paste your favourite dish here.

How to Play:

Pick your restaurant name together

Add one green item and one favourite item

Let your child draw or paste dishes.

Add stickers or doodles for decoration!

Memory Box

Draw or paste your favourite dish here.

Why it works: Kids eat better when they feel involved and in control. 🌱

Leaf Detectives

Every leaf tells a story – can you uncover it?

How to Play

- ☒ Collect 3–4 leaves.

Leaf 1

- ☒ Name: _____
- ☒ Color: _____

Leaf 2

- ☒ Name: _____
- ☒ Color: _____

Leaf 3

- ☒ Name: _____
- ☒ Shape: _____

Detective Findings

- ☒ Texture _____
- ☒ Pattern _____
- ☒ Veins _____
- ☒ Smell _____

Tip: Is your bald coriander really Cilantro?

How to Play:

- Collect 3–4 leaves.

- Observe them closely.

- Fill your notes below.

- Add stickers or doodies for decoration!

Oak

- Color: Green
- Shape: Pointy

Create Your Leaf Art

Draw, trace, or paste your favorite leaf.

• Oak

- Color: Green
- Shape: Pointy

Mystery ingredients Game

A playful guessing game before the first bite

Help your child get curious about food using their senses – not pressure.

What's the Idea?

Your child explores a green ingredient *without seeing it*.

There's no right or wrong – just curiosity.

What You Need

✓ 3-4 green ingredients

- Ask your child to close their eyes.
- ☐ Small bowls

One Sense at a Time

- Let them:
 - ☐ Touch it ☐ Smell it
 - ☐ Hear it (is it crunchy? Soft?)

How to Play

1. Hide the Ingredient

Ask your child to close their eyes.

2. One Sense at a Time

Let them:

- ☐ Touch it
- ☐ Smell it
- ☐ Hear it (is it crunchy? Soft?)

Guess Together

Ask gently:

- ➔ ☐ What do you think this could be?

What Did I Think?

Ingredient	My Guess
☐ _____	_____ ☐ ☐ No
☐ _____	_____ ☐ ☐ No
☐ _____	_____ ☐ ☐ No

Tiny Win Tracker

- ✓ Touched a new food
- ✓ Smelled a green
- ✓ Stayed curious

♥ Parent Whisper

Curiosity always comes before liking.
Exploration today → comfort tomorrow

Optional Fun

- ☐ Draw the ingredient
- ☐ Give it a funny name.
"Green Cloud."
"Crunchy Stick"
"Leafy Monster"

FLOATING VEGGIES

Can you guess who floats and who sinks?

A fun, hands-on science experiment that turns vegetables into curious discoveries.

What You Need

- ✓ A bowl or tub filled with water
- ✓ 4–6 vegetables
- ✓ A towel (for spills!)

Pick Your Veggies

Choose a mix from below (or add your own):

Try These Floaters ▲▲

- Leafy spinach
- Lettuce
- Spring onion
- Cabbage leaf

Try These Sinkers ▼▼

- Carrot
- Potato
- Tomato
- Beetroot

Make a Guess

Before dropping them in water, ask:

- ★ Which veggie will float?
- ★ Which one will sink?

Test Time!

Drop one veggie at a time into the water.
Watch closely... what happens?

Your Veggie Bowl!

- Why do you think some veggies float?
- How does size or air inside change what happens?

Parent Tip

Floating veggies are usually lighter or have air inside.
No need to explain too much—wonder is enough!

During Meal Adventures

When mealtime feels calm, safe, and connected.

These activities help your child stay relaxed at the table, reduce overwhelm, and build trust with food - especially greens. The goal is connection over correction, presence over pressure.

What this section is about:

- Creating a low-stress mealtime atmosphere
- Letting your child explore food at their own pace
- Using gentle cues instead of commands
- Turning meals into small moments of comfort and curiosity
- Focus on comfort-not "one bite" demands.
- Keep the atmosphere playful but gentle

Why this matters:

When a child feels calm, seen, and unpressured-their brain stays in "safe mode," This is where willingness grows - and defenses melt.

How this helps (the bigger goal):

Calm, connected mealtimes teach your child that greens are not a battle or a demand -they simply exist in a safe, loving space.

During Mealtime Fun!

Turn everyday meals into joyful moments of discovery.

**Food
Emotion
Dice**

**Aroma
Bingo**

**Texture
Detective**

Food Emotion Dice

Turn emotions into a playful mealtime game!

- Make a dice with foods showing different faces.
- Roll it each turn, acting out the matching expression.
- Giggle and munch your way through different feelings.

Aroma Bingo

Can you guess the smell before you see it?

How to Play:

1. Collect small containers with everyday kitchen aromas (mint, garlic, lemon, clove, etc.).
2. Each player gets a bingo sheet with scent names or icons.
3. One person opens a jar -everyone guesses!
4. Mark your bingo when you get it right.
5. First to complete a row wins a "Super Sniffer" badge!

Through laughter and little whiffs, kids learn the magic hidden in everyday food.

Texture Detective

Can your hands guess what's on the plate?

How to Play:

- Gather 4-5 safe foods with different textures.
- Blindfold your little detective!
- Let them touch, squeeze, and describe what they feel.
- Guess the food-then taste to confirm!

Award badges:

- Smooth Spotter
- Crunchy Catcher

Touch, feel, and giggle-because discovery starts at your fingertips.

Weekend Fun Time Adventures

What you'll do on weekends:

- Create playful, low-pressure green experiences
- Use sensory play, stories, and fun green challenges
- Try comfort-building activities (not eating goals)
- Make greens part of family time
- Explore freely - no expectations

Why this matters:

Relaxed weekend moments create positive emotional memories.

Greens start to feel safe, fun, and familiar -not scary.

How this moves you toward the bigger goal:

Weekend fun builds the emotional base for acceptance. Your child begins seeing greens as part of joy, not pressure.

Weekend Fun Time

- 7 Day Green Challenge
- Family Fav Tracker
- Parent Reflection Page
- Green Tracker
- My Fav Green Graph
- Family Cooking Day
- Recipe Scrapbook
- Veggie Stamp Art

THE GREEN CHALLENGE

Make Eating Greens a Family Adventure!

7-Day Green Challenge

Try one green veggie each day for a week — and celebrate every effort together.

DAILY GREEN PLAN

- 🥬 Day 1 Spinach Power Rolls
- 🥦 Day 2 Peas & Potato Cutlets
- 🥒 Day 3 Cucumber Salad Smiles
- 🥦 Day 4 Palak Paratha
- 🥦 Day 5 Broccoli Rice Bowl
- 🥬 Day 6 Green Sandwich Magic
- 🥬 Day 7 Surprise Green Smoothie

(Tip: Portion size doesn't matter—even a bite counts!)

GREEN CHALLENGE	
MON	★ ★ ★
TUE	★ ★
WED	★ ★
THU	★
FRI	★ ★ ★

(Tip: Portion size doesn't matter—even a bite counts!)

How to Play

- ✓ Give your child ★one Green Star★ for every green they try
- ✓ Stars can be for tasting, touching, or even smelling
- ✓ No pressure to finish the plate.

Green Hero Moment

- ✓ At the end of the week, crown your child as the « Green Hero of the Family »

(High-five, hug, sticker, or special family meal)

Green Challenge Tracker

Mon	Tue	Wed	Thu	Fri	Sat	Sun
☐	☐	☐	☐	☐	☐	☐

Parent Note:

Small steps count. Consistency matters more than perfection.

Family Favorites Tracker

Keep track of which greens your family loves the most!

How to use this page:

1. Write down the dish name under “Green Dish Tried”
2. Add a checkmark (☑) for each family member who liked it.
3. Use the “Comments” column to note ideas or improvements.

Celebrate every new green your child enjoys - maybe even a “Green Star of the Week!”

Green Dish Tried	Mom	Dad	Child 1	Comments

Parent's Reflection Page

Your journey of helping little ones eat green!

Every child's food story is unique- and so is yours! Use this page to note your child's favourite green recipes, small wins, or fun kitchen memories. Reflect on how your family's relationship with greens has grown!

1. My child's favorite green dish:
2. A funny or happy mealtime moment:
3. Greens my child started liking recently:
4. What I learned as a parent about healthy eating:

Remember-Progress, not perfection! Every green bite counts.

My Green Tracker

Track your weekly green adventures!

How to Use

1. Each day, write one green food your child tried.
2. Let your child circle a face to show how it felt.
3. Trying matters more than liking – every green bite counts.
4. At the end of the week, choose your “Green of the Week” together.

Taste Faces

😊 Loved it. 😊 It was okay 😞 Not yet

What we loved most. _____

Little Win Today

- ☐ Tried something new
- ☐ Ate one green
- ☐ Helped in the kitchen
- ☐ Had fun together

Memory Corner

Draw, doodle, or write something you want to remember

Blank space for drawing or writing.

"Today in our kitchen, we felt..."

Gentle Note for Families

This page isn't about perfect recipes,
Its about shared moments.
messy hands, and food memories
your child will carry forever.

WEEKEND WONDERS — FAMILY COOKING DAY

The joy of messy hands, shared laughter, and little lessons.

Saturday mornings are for aprons and laughter. We let little hands measure, stir, and sprinkle — sometimes neatly, sometimes not.

Flour flew. Mint was torn.
No one rushed to clean it up.

That day, we weren't just cooking.
We were learning teamwork, patience,
and the quiet joy of doing something together.

You're not raising a perfect eater.
You're raising a confident helper,
a curious learner,
and a child who feels welcome
in the kitchen.

Try This Together

Pick one weekend meal to cook as a family.

- Give your child one real job:
- Stirring
- Washing greens
- Tearing leaves
- Plating food

★ Rotate the role each week

★ End by celebrating your
"Chef of the Day"

Veggie Stamp Art

Create art using vegetables!

What You'll Need

- 2-3 vegetables (capsicum, carrot, okra, potato)
- Paint
- Paper
- An adult helper

An adult helper

Space to Create

Stamp your artwork here

Stamp your artwork here

1 Cut

An adult cuts the veggies in half.

2 Dip

Dip the cut side in paint.

3 Stamp

Press onto paper to make shapes and patterns.

4 Repeat & Explore

Try different veggies and colors.

Talk Together

- Which veggie made your favorite shape?
- What does it look like?

Gentle Note for Parents

Messy hands = creative minds

Mama, you're doing an amazing job!

Some days, getting our little ones to eat their greens feels like an uphill climb. But remember, even the smallest victories—like trying one new leaf or taking one brave bite—are huge wins. You're  nurturing healthy habits that will grow with them.  

With love—

From One Mom to Another

Grocery Checklist

A handy list to stock your fridge with the good stuff!

Leafy Greens

- ☐ Spinach (Palak)
- ☐ Fenugreek (Methi)
- ☐ Amaranth (Chaulai)
- ☐ Coriander (Dhaniya)
- ☐ Mint (Pudina)
- ☐ Cabbage
- ☐ Lettuce

Green Veggies

- ☐ Broccoli
- ☐ Beans
- ☐ Bottle gour(Lauki)
- ☐ Bitter gourd (Karela)
- ☐ Cucumber
- ☐ Zucchini

Herbs & Add-ons

- ☐ Basil
- ☐ Curry leaves
- ☐ Spring onion
- ☐ Celery
- ☐ Green chillies
- ☐ Lemon

Frozen & Prepped

- ☐ Green peas
- ☐ Corn
- ☐ Mixed veggies
- ☐ Spinach puree

Tip: Wash, dry, and store your greens in cotton bags - they'll stay fresh all week!

My Green Plate

A simple visual guide to balanced, colorful meals!

Adds color
and vitamins!

Don't
forget
to drink
water.

Tip: Let your child arrange their own 'Green Plate'- it makes eating healthy more fun!

Weekly Green Meal Planner

Plan once, eat healthy all week!

Here's your week of healthy greens! Mix, match and enjoy away- one green dish a day keeps the fuss away.

Day	Breakfast	Lunch	Dinner
Monday	Spinach paratha	Green moong dal	Broccoli stir-fry
Tuesday	Peas poha	Palak paneer	Cucumber raita
Wednesday	Green smoothie	Veg pulao with beans	Methi thepla
Thursday	Spinach omelette	Coriander rice	Peas soup
Friday	Green sandwich	Bottle gourd curry	Mashed Peas
Saturday	Veg idli with chutney	Tofu salad	Lauki kofta

Tip: Keep Sundays flexible - involve your kids in planning their favourite greens!

Seasonal Greens Guide

Eat Fresh • Eat Local • Eat Smart

Every season brings its own green heroes. Eating seasonal greens keeps meals fresh, affordable, and connected to nature.

Spring (Feb – April)

Light, fresh & gentle greens

• Spinach

• Broccoli

• Spring Onions

Best for: Energy & digestion

Monsoon (Aug – Sept)

Immunity-supporting greens

• Dill (Suva)

• Colocasia Leaves

• Green Chillies

Best for: Immunity & strength

Summer (May – July)

Cooling & hydrating greens

• Cucumber

• Bottle Gourd

• Amaranth

Best for: Cooling the body

Autumn & Winter (Oct – Jan)

Warming & nourishing greens

• Mustard Greens

• Bathua

• Fenugreek (Methi)

Best for: Warmth & immunity

How to Use This Page

- Pick **one** seasonal green each week
- Cook it any way your child enjoys
- Talk about why this green grows now

Mom Tip

Stick this page on your fridge. Let your child choose the green of the week

Building Healthy Habits

★ Small daily wins that grow big green confidence

Healthy eating isn't built in a day, It grows gently — one green bite, one shared moment at a time.

1 Add One Green a Day

Start small.

A spoon of peas in rice, spinach in dal, or cucumber on the side is enough.

2 Eat Together

Children learn by watching.

When they see you enjoy greens, they feel safer trying them too.

3 Let Them Choose

At the market or store, invite your child to pick **one green** for the meal.

Choice builds curiosity — not pressure.

4 Track the Wins

- Use a simple weekly tracker or stickers to celebrate effort, not outcomes.

Parent Reminder

Progress matters more than perfection. ♥

Every calm meal, every tiny try, counts.

The Power of One Bite

Small beginnings, big changes.

One bite is all it takes to start a new story.
The first time your child tastes something green,
they're not just trying food
they're tasting courage, curiosity, and trust.
That single bite means more than you think.
It's the moment your child learns to say, "I can try."

Every green habit starts with one brave bite.

Mom's Club Edition

A cozy corner for moms who are figuring it out—
one green bite at a time.

Real Mom Chats

Sometimes all it takes
is one honest conversation.

- ✓ "My child finally tried broccoli... after 7 tries!"
- ✓ "Turning peas into smiley faces actually worked."
- ✓ "No pressure dinners saved my sanity."

Your story might be exactly what
another mom needs to hear today.

"My child finally tried broccoli...
after 7 tries!"

"Turning peas into smiley faces
actually worked."

"No pressure dinners
saved my sanity."

Fun Swap Ideas

Borrow what works.
Share what doesn't.

- ✓ Easy green hacks for busy days
- ✓ No-fuss recipes kids didn't reject
- ✓ Creative ways to serve the same veggie differently
- ✓ Small wins that felt big at home.

No perfection. Just practical ideas
from real kitchens.

Community Spark

Every shared win creates a ripple.

When one mom shares a trick,
another mom gains confidence.

When confidence grows,
kids grow braver too.

That's how habits change—**together**.

Join the Eat Your Green Community

- ✓ Ask questions.
- ✓ Share your wins (and struggles)
- ✓ Learn from moms just like you
- ✓ Celebrate progress—not perfection

Gentle Reminder

Small steps matter.

Messy meals are learning moments.
And every green attempt counts.

Little Wins, Big Smiles

Big win today:
My son asked
for peas in his
pasta – no
prompting. Just
beamed with
pride. – Sarah

My daughter
helped to make
a salad for the
first time. I'm one
proud mama!
– Dipti

He packed his
own "green box"
for lunch! I'll
never forget
that smile.

– Anna

Our kitchen dance
party ended with
kale chips. Who
knew greens could
be so fun!

– Leah

**Greens grow faster
when shared with laughter.**

Talk Green, Not Mean

Choose words that open the door to
veggie conversations—and connection.

 Say This	 Not That
 What's this veggie's superpower?	 Eat your veggies.
 How can we give broccoli a superhero name?	 Broccoli is good for you.
 Do you want to try the carrot or the bean first?	 You have to eat your veggies.
 It's okay to lick or nibble at first.	 Finish all the greens on your plate.

Kids copy our excitement and curiosity.
So next time you talk, sprinkle some
questions, stories, and fun into the mix.

STAGE 6 — CONFIDENCE®

STAGE 6 — CONFIDENCE

Where comfort becomes confidence.

The final stage in your journey. This stage transforms the sense of comfort you've built into lasting, genuine confidence with greens.

What you'll learn:

- How to spot self assurance around greens
- How to gently expand your child's comfort zone
- How to make greens less intimidating

How this moves you toward the bigger goal:

Confidence turns comfort into resilience — creating a positive, open relationship with greens for years to come.

———— You are here — Stage 6 of 6 ————

How to Know Your Child Is Becoming Confident

Confidence shows up in small, everyday moments-often before a child ever eats the green.

- They touch or hold a new green without hesitation
- They talk about greens with curiosity, not fear
- They try tiny tastes on their own terms
- They don't get overwhelmed by new textures
- They stay calm even if they don't eat it

A calm child's a confident learner.

Small Wins That Builds Big Confidence

These simple moments create long-term trust with food.

- Letting your child serve themselves
- Trying greens in playful forms first
- Mixing familiar + unfamiliar foods
- Allowing them describe textures in their own words
- Celebrating effort, not bites

Confidence grows through freedom, not force.

What Confidence Looks Like Over Time

When confidence becomes internal, their relationship with greens transforms.

- Mealtimes feel peaceful
- Your child explores without prompting
- Greens becomes normal, not scary
- Eating becomes about connection, not performance
- Your child trusts their own body

This is the beginning of lifelong ease with greens.

GREEN CONFIDENCE TRACKER

**EAT
YOUR
GREEN**

Each time your child tries a new green, write it down below! Wait for them to take any action, then mark mood:

WEEK	NEW GREEN TRIED	ACTION TAKEN				KID'S MOOD	LITTLE REWARD
		Touch	Smell	Lick	Taste		
		☐	☐	☐	☐	 	☐
		☐	☐	☐	☐	 	☐
		☐	☐	☐	☐	 	☐
		☐	☐	☐	☐	 	☐
		☐	☐	☐	☐	 	☐
		☐	☐	☐	☐	 	☐
		☐	☐	☐	☐	 	☐
		☐	☐	☐	☐	 	☐

TROUBLESHOOTING:

Why Greens Still Feel Hard

My child refuses before even trying.

Why it happens:

Fear + unfamiliar texture

- ✓ Offer "Touch First" moments
- ✓ Use "You don't have to eat it" safety line
- ✓ Keep greens visible daily in small ways

They spit it out immediately.

Why it happens:

Texture mismatch

- ✓ Match their sensory profile (Crunch / Melt / Dip)
- ✓ Change preparation, not the vegetable
- ✓ Try dips, purees, crispy versions

They don't want it IN their food.

Why it happens:

Loss of control

- Serve greens s on the side
- Let them assemble their own plate

They used to eat it... now they don't.

Why it happens:

- Switch colors & formats (rainbow style)
- Bring novelty in plating
- Use experience-based activities (CS)

Parent reminder:

Greens acceptance grows with trust + repetition + sensory safety

Small exposures = big wins

FREQUENTLY ASKED QUESTIONS

Helping you feel supported every step of the journey

1. What if my child still refuses greens?

That's completely normal. Refusal is part of the learning curve. Your only job is to keep offering greens in gentle, pressure-free ways.

2. How long will it take to see progress?

Every child is different. Some show curiosity in days, others take weeks. Consistency + emotional safety = real change.

3. Should I encourage "just one bite"?

No. Even soft pressure can backfire. Let your child explore at their own pace - curiosity beats compliance.

3. Can I use rewards?

Avoid reward-based eating. Connection, play, and autonomy are stronger long-term motivators.

6. What if grandparents or others force-feed?

Share your approach calmly: "We're helping them build confidence, not fear."

8. What age does this method work for?

Best for 1.5 to 7 yrs, but even older children benefit from gentle exposure.

4. What if my child has sensory sensitivities?

Then this method is *exactly* for them. Sensory-first, pressure free exposure helps reduce fear and overwhelm.

QUICK START GUIDE

Your 3-Day Shortcut to Helping Your Child Trust Greens

1. Start With Curiosity

- ✓ Show, don't serve
- ✓ Invite exploration
- ✓ Add one playful prompt: "Can you guess the smell?"

2. Build a Micro-Win

- ✓ Choose ONE action: touch → smell → lick
- ✓ Pair with a favourite food
- ✓ Use no-pressure language

3. Connect It to Something Fun

- ✓ Do one mini activity (a) Color sort (b) Floating veggies (c) Leaf detective
- ✓ Create a 20-second "success moment"
- ✓ Add the win to your Green Confidence Tracker

Dear Mom,

You've done something beautiful – not just by reading this book, but by showing your child that health can be joyful. 🌱

Remember, it's not about being perfect. It's about the love, creativity, and patience you bring to every meal.

Every time you turn spinach into a smile or broccoli into laughter, you're teaching your child something far more powerful than nutrition – you're teaching them care, joy, and gratitude. ❤️

Keep going, Supermom.
One green bite at time,
you're raising a
generation that
will thank you later.

Acknowledgements

To every mom who turned a meal into a memory, every child who made a mess before a miracle, and every heart that believes love can change even the pickiest plate.

This book was born from shared sighs, laughter, and those tiny "just-one-bite" moments that taught me more than any recipe ever could.

A heartfelt thank you to my family - for being my first taste testers, my quiet cheerleaders, and my reason to keep turning greens into smiles.

To the wonderful mothers who shared their stories, and to every reader who found a piece of themselves in these pages - this book is for you.

With love, Prerna Sultania

CONTINUE YOUR EAT YOUR GREEN *Journey*

Helping families raise confident eaters, one small step at a time.

1 A MOM'S GUIDE TO RAISE VEGGIE LOVING KIDS

A practical guide that helps parents turn vegetable resistance into curiosity, acceptance, and lifelong healthy habits.

✦ Make vegetables easier, enjoyable, and stress-free.

2 RAISING KIDS IN A JUNK FOOD WORLD

Helping parents raise confident eaters in a world filled with ultra-processed foods, marketing, screens, and everyday food challenges.

✦ Build healthy habits without guilt, pressure, or perfection.

3 COMPLETE TOOLKIT

A collection of activities, games, trackers, and printable resources that make healthy eating fun and engaging for children.

COMING UP NEXT

On the following pages, you'll see 2 full sample activities
from the collection:

» DIY Plate Art • Veggie Stamp Art

DIY Plate Art

Food can be art too.

Use vegetables to create anything you like on the plate.
Arrange, stack, or imagine. Eating is optional.

What did you
make today?

Does your art
have a name?

One way to try

- ☐ I arranged vegetables ☐ I made a picture
☐ I used my imagination

My plate art is called:

One thing I liked doing:

Veggie Stamp Art

Veggies make patterns too.

Cut vegetables, dip in color, and stamp.
Messy hands are welcome. Eating is optional.

- ☐ I dipped a veggie ☐ I stamped a pattern
☐ I tried again

My pattern looks like:

One thing my hands noticed:

Thank You & Keep Growing

Every story you read, every recipe you try, and every smile at the dinner table - you're growing something far more beautiful than just healthy habits.

You're growing connection, courage, and care. Keep cooking, keep laughing, keep trying because every little green step matters.
